

## METS '09

17-19 november 2009

At SmartRigging it has been a busy year. Besides the production and delivery of standing rigging for numerous projects we managed to find time for an evolutionary R&D project. R&D is the essence of what SmartRigging is all about. The constant search for improvement.

### **The Next Step...**

After careful research, it became clear that our current production facility provides us with a sublime production method for **The next Step...**

Come and see us and find out what we have been up to.  
Stand 02.501 Hall 2

### **A little "get-together":**

It is not our intention to "present" new developments, but if you happen to drop by for a drink on Tuesday November 17 around 1600 PM, we are more than happy to fill you in on what we have been developing this past year.

We are keen to know what you are up to and how we can contribute to your success. So please come and have a drink with us.
